WHY CIRCUMCISE?

1 PREVENTS STIs AND LOWER THE RISK OF HIV

The skin inside the foreskin is soft and bruises and tears easily. It gives HIV and STIs a way to enter the body. Come for MMC and lower your risk.

2 KEEP CLEAN

The foreskin covers the head of the penis and it's difficult to keep clean. Come for MMC and stay fresh.

3 LOWER CANCER RISK FOR YOU AND YOUR PARTNER

The foreskin can carry a virus called the human papillomavirus that increases a woman's risk of cervical cancer. MMC lowers the risk of you developing cancer of the penis. Come for MMC and take care of your partner and yourself.
